The diagram illustrates the assembly of an engine's valve train. Key components shown include the intake camshaft (1) and exhaust camshaft (2), both equipped with camshaft adjuster units (4, 6). A timing chain (3) with a tensioner (4) is used to synchronize the camshafts. The camshafts are driven by a toothed belt pulley (8) and a woodruff key (9). The valve train consists of roller rocker arms (11) with equalizing elements (12), intake valves (13), and exhaust valves (14). Each valve is equipped with a spring (15) and a spring seat (16). The valves are secured with cotter pins (17) and stem seals (18). The entire assembly is mounted on the engine block, which is shown at the bottom of the diagram.
