☐ Disassembling center console

08-20-2010 01:01 AM

#1

Is there anyone that has a schematic how to do this. I'm a little clumsy when it comes to that kind of stuff and I don't want to ruin it.

The reason I'm asking is because my passenger managed to spill coffee over the center console. I got it all cleaned. But the hand break is sticking a little now and it's kind of irritating. So I want to take it apart and clean it out thoroughly.

When I searched all the came up was how to retrofit an arm rest into the center console.

Thanks!

I'm too tired to search but search for someone that has added the euro cup holder. Might give you better results finding the person/people who have done DIY's on that! [🔗](#)

Looks like I can remove it from the center console without having to replace the whole thing. Has anyone done this?   Reply With Quote

Hi All, I've purchased a used armrest to retrofit into the wifes 2010 Golf. I'm pretty sure I got everything in place to be able to reassemble the entire console, however I am running into an issue where parts N68-10362 Meets N68-10363. I can't get the 2 parts flush near the base of part N68-10362. Any tips how to reassemble so they snap together as factory? Thanks a mil in advance. I've spent about 4 hours trying to make the 2 pieces fit 😞 - Alex   Reply With Quote
